Subject: NCSC WAIS conference

George,

Feb 3-4 is soon upon us. A month is not alot of time to get a large group of key people together. I have not been doing much on my end towards the conference (trying to finish a round or products), and I dont think it is concrete enough for barbara to take over.

What should we do from here? I am still planning on being there.

I will be home today, sunday (415-282-5836) , and in the office tomorrow 415-329-9300.

Subject: Kudzu Rollout

From: George Brett <ghb@concert.net>  
Date: Mon, 2 Dec 91 16:05:40 EST

Seem like monday and tuesday Feb 3 and 4 are the dates for the WAIS workshop.

Clifford, Brewster asked if that conflicts with any networking, information, or library conferences..... none that I know of. You?

The hard question now is should we do an 'invitation' or open it up? The most we can handle at MCNC is 125 and that puts them in the main building, not the Supercomputing Center... if we go there it moves down to 40 or 50 (I'm not sure.) If we move to an 'open' forum we may have to move to one of the local hotels, Sheraton or such with large ballroom facilities. Thoughts on the matter?

-- george

This is very very soon. We will have to move very fast.

I would like to have meeting near machines. If we have it at a hotel, it will just be postering. Are there good connections and machinery at MCNC? If so, lets keep it to less than 125.

We can have it at Thinking Machines in Cambridge, if you like, but that defeats a large part of the rollout mission.

First let me say that I have been negligent in getting your first list back to me. The list I have ... unfortunately not here, includes your original to me plus others from my list. Cliff had no suggestions. Jim added 4 or 5. Still it added up to 60 - 70 names. I have more local people that I'd like to fill on a space available basis. Could you just carbon me on the invites you send out? and I'll try to get the list to you asap..... I know too well about avalanches and being buried.

>

> I suggest a VCR and TV for a video if it is easy. There is the CNN video

> on WAIS and a 2 minute demo which comes across well.

We have no problem providing this function. CONCERT is a video network and there are many vcr units.

> I think it might be easier to just send you the papers.

Sounds great.... can you send quick all paper you'd like included and we'll photo copy it into the proceedings.

I'll be sending more in the a.m.

-- george

you never sleep, do you?

I will start sending some invites, and cc you on them.

forward  
> to it.  
I think we're doing all right. 85 people are registered so  
far. about 50-50 for instate and out of state. Good looking  
list.!

>  
> I will be arriving on Sunday, and would like to meet up with you then if  
> possible, or at least talk on the phone. If possible, I might have to  
make  
> some last minute slides.  
Ok, my home phone is 919-286-9235.  
I am setting up a mac with telnet access that will project  
onto the large screen if you want to do a live demo.

>  
> Could you send highway directions (via email) and how I can contact you  
> when I get there.  
MCNC is on Cornwallis Road in Research Triangle Park. It is  
off of the Durham Freeway NC 147. The best thing to do is  
probably give me a call and let me verbalize the instructions.  
Do you know where you are going to stay?

>  
> I hope that barbara can help.  
I think we have things in control..... I hope!

BTW we'll have 2 macs, 1 ibm pc, and 1 NeXT for demonstration  
machines.  
- george

this sounds great! Thank you for the instructions. I am sitting on a  
porch of a floating house on a lake in Georgia. Laptops and networks are  
going to change the world.

I will call on sunday morning. I will be arriving in the afternoon, I  
think.
